Valid from 25 April 2018

Connection to the power network for low voltage

| Service | Price not including VAT | | Price including VAT | |
|--|-------------------------|--------------------|---------------------|--------------------|
| Connection to the power network if the connection point is less than 400 m from a low-voltage substation | 130.00 | euros per amp | 156.00 | euros per amp |
| Connection to the power network if the connection point is more than 400 m from a low-voltage substation <ul style="list-style-type: none"> Elektrilevi project management fee at a rate of 3.35% of the total cost of the work will be added to the connection fee | Calculation* | | | |
| Contract handling fee <i>Added to each connection contract</i> | 60.00 | euros per contract | 72.00 | euros per contract |

Connection to the power network for medium voltage

| Service | Price not including VAT | | Price including VAT | |
|--|-------------------------|--------------------|---------------------|--------------------|
| Connection for medium voltage Elektrilevi project management fee at a rate of 3.35% of the total cost of the work will be added to the connection fee | Calculation* | | | |
| Contract handling fee <i>Added to each connection contract</i> | 60.00 | euros per contract | 72.00 | euros per contract |

*Calculation: calculated from the actual costs. Includes the cost of equipment, materials and building work.

Elektrilevi price list

Valid from 25 April 2018

Connection to the network for an electricity producer

| Service | Price not including VAT | Price including VAT | | |
|--|-------------------------|---|-------|--------------------|
| Connection to the power network for a producer of up to 15 kW if the connection point is less than 400 m from a low-voltage substation <ul style="list-style-type: none"> Calculated from the actual costs (Calculation 1) but not less than the ampere price based fee | Calculation* | <i>but not less than the ampere price fee for connection to the power network for low voltage</i> | | |
| Connection to the power network for a producer of up to 15 kW if the connection point is more than 400 m from a low-voltage substation <ul style="list-style-type: none"> Elektrilevi project management fee at a rate of 3.35% of the total cost of the work will be added to the connection fee | Calculation* | | | |
| Connection for a producer of 16–200 kW for low voltage <ul style="list-style-type: none"> Elektrilevi project management fee at a rate of 3.35% of the total cost of the work will be added to the connection fee | Calculation* | | | |
| Connection for a producer of over 200 kW for low voltage <ul style="list-style-type: none"> Elektrilevi project management fee at a rate of 3.35% of the total cost of the work will be added to the connection fee | Calculation* | | | |
| Connection to the power network for an electricity producer for medium voltage <ul style="list-style-type: none"> Elektrilevi project management fee at a rate of 3.35% of the total cost of the work will be added to the connection fee | Calculation* | | | |
| Contract handling fee <i>Added to each connection contract</i> | 60.00 | euros per contract | 72.00 | euros per contract |

*Calculation: calculated from the actual costs. Includes the cost of equipment, materials and building work.

Connection to the power network in special cases

| Service | Price not including VAT | Price including VAT | | |
|---|---------------------------------|---------------------|-------|--------------------|
| Connection for a consumer of under 6 A for low voltage | Calculation* | | | |
| Creation of an additional independent network connection in a low-voltage network | Calculation* | | | |
| Connection to the power network for low voltage if the connection point is less than 400 m from a low-voltage substation but there is a significant obstacle to the connection (e.g. sea, lake, marsh, protected zone, utility works, etc.) | Calculation* | | | |
| Joining a three-way cooperation agreement | 3.35% of the total cost of work | | | |
| Contract handling fee <i>Added to each connection contract</i> | 60.00 | euros per contract | 72.00 | euros per contract |

*Calculation: calculated from the actual costs. Includes the cost of equipment, materials and building work.

Elektrilevi price list

Valid from 25 April 2018

Signing a network contract

| Service | Price not including VAT | | Price including VAT | |
|--|-------------------------|--------------------|---------------------|--------------------|
| Signing a network contract | Free of charge | | | |
| Changing the network service price package if the last change was less than 365 days ago | 8.35 | euros per contract | 10.02 | euros per contract |

Main fuse services

| Service | Price not including VAT | | Price including VAT | |
|--|-------------------------|--------------------|---------------------|--------------------|
| Increase in the nominal current of the main fuse or purchase of additional amps if the connection point is less than 400 m from a low-voltage substation | 130.00 | euros per amp | 156.00 | euros per amp |
| Increase in the nominal current of the main fuse or purchase of additional amps if the connection point is more than 400 m from a low-voltage substation | Calculation* | | | |
| Replacement of a main fuse of up to 63 A <i>No contract handling fee is charged</i> | 38.13 | euros per project | 45.76 | euros per project |
| Replacement of a main fuse of over 63 A | Calculation* | | | |
| Reduction of the amperage of a main fuse of up to 63 <i>No contract handling fee is charged</i> | 38.13 | euros per project | 45.76 | euros per project |
| Reduction of the amperage of a main fuse of over 63 A | Calculation* | | | |
| Division of the nominal current in a main fuse | Calculation* | | | |
| Restoration of the amperage of a main fuse of up to 63 A** <i>No contract handling fee is charged</i> | 38.13 | euros per project | 45.76 | euros per project |
| Restoration of the amperage of a main fuse of over 63 A | Calculation* | | | |
| Contract handling fee <i>Added to each connection contract</i> | 60.00 | euros per contract | 72.00 | euros per contract |

*Calculation: calculated from the actual costs. Includes the cost of equipment, materials and building work.

**The main fuse amperage can be restored within three years of lowering and there is a fee for the service. The cost of restoring the main fuse amperage depends on how many customers have connected to the same network after the reduction of the amperage. If the network does not require strengthening (few new connections have been made), the amperage can be restored at 45.76 euros per project (the price of changing the main fuse). If the network requires strengthening, the customer has to pay a calculated price for the restoration of the amperage also for a fuse of up to 63 A.

Elektrilevi price list

Valid from 25 April 2018

Metering services

| Service | Price not including VAT | | Price including VAT | |
|---|-------------------------|-----------------|---------------------|-----------------|
| Transfer to dual-tariff package <ul style="list-style-type: none"> For the owner of a new meter suitable for remote reading or customer using a remotely read meter | Free of charge | | | |
| Transfer to dual-tariff package <ul style="list-style-type: none"> Customers who do not have a remotely read meter or have not been transferred to remote reading will have to order the service "Replacing a meter at the customer's request" for a fee | 17.29 | euros per meter | 20.75 | euros per meter |
| Laboratory inspection of an electricity meter (metering system) from - A meter replacement fee of 20.75 euros is added to the price | 53.54 | euros per meter | 64.25 | euros per meter |
| Replacement or installation of an electricity meter (metering system) at the customer's request | 17.29 | euros per meter | 20.75 | euros per meter |
| Remote reading at the customer's request | 122.54 | euros per meter | 147.05 | euros per meter |
| Replacement of a electricity meter (metering system) by Elektrilevi OÜ if the meter is due for testing | Free of charge | | | |

Changing the power system

| Service | Price not including VAT | | Price including VAT | |
|--|-------------------------|--------------------|---------------------|--------------------|
| Change from a single-phase connection to a three-phase connection | Calculation* | | | |
| Connection of a place of consumption of 3 x 220 V (Tallinn old voltage system) to a 3 x 220/400 V power system <i>No contract handling fee is charged</i> | Free of charge | | | |
| Contract handling fee <i>Added to each connection contract</i> | 60.00 | euros per contract | 72.00 | euros per contract |

*Calculation: calculated from the actual costs. Includes the cost of equipment, materials and building work.

Sealing

| Service | Price not including VAT | | Price including VAT | |
|--|-------------------------|-------------------|---------------------|-------------------|
| Sealing of an electrical installation at the customer's request | 11.72 | euros per project | 14.06 | euros per project |
| Sealing of an electrical installation and removal of an earlier seal at the customer's request | 20.33 | euros per project | 24.40 | euros per project |
| Sealing in bulk for electrical installations (starting from the second seal in a building) at the customer's request | 2.80 | euros per seal | 3.36 | euros per seal |

*The price also applies if some connection points are not sealed during sealing in bulk.

Call-outs and repair team call-outs, including the electrical work

| Service | Price not including VAT | | Price including VAT | |
|--|-------------------------|-------------------|---------------------|-------------------|
| Call-out fee The call-out fee needs to be paid only if it is discovered after we arrive at your place of consumption that the work for which the customer is responsible has not been done or that the metering system is functioning properly. For example: <ul style="list-style-type: none">• you have ordered the sealing service but not done the preliminary work needed, so that the sealing is not possible;• you have disconnected your place of consumption from the main fuse and not the switch on the meter, regardless of reminders;• you have told us that a meter or a programmable clock has failed, but it becomes clear when we arrive that the system is in working order. A call-out for an electrician cannot be ordered as a separate service. | 16.69 | euros per project | 20.03 | euros per project |
| Call-out for the breakdown team A fee must be paid if our repair team arrives and finds the breakdown to be in the customer's electrical installation inside an apartment or home (internal electrical system). You can additionally order the repair of a breakdown in a customer's private electricity system. | 21.17 | euros per item | 25.40 | euros per item |
| Services provided by a repair team on a call-out | | | | |
| Repairing a breakdown in a customer's electricity system* If our repair team arrives and finds the breakdown to be in the customer's electricity system, you can order the breakdown to be fixed. We will fix the breakdown in the customer's electricity system. The price includes up to 30 minutes of work. | 52.00 | euros per job | 62.40 | euros per job |
| Each following 30 min | 29.17 | euros per 30 min | 35.00 | euros per 30 min |
| The following is added to the price of fixing a breakdown: <ol style="list-style-type: none">1) additional material used for fixing the breakdown (such as terminals, additional cables, etc.).2) repair team call-out fee (25.40 euros including VAT). | | | | |

*The repair team call-out fee (25.40 euros including VAT) is always added to the price of the service.
