Connection to the power network for low voltage

Service	Price not including VAT		Price including VAT	
Connection to the power network if the connection point is less than 400 m from a low-voltage substation	165.00	euros per amp	198.00	euros per amp
Connection to the power network if the connection point is more than 400 m from a low-voltage substation <ul style="list-style-type: none"> <i>Elektrilevi project management fee at a rate of 3.35% of the total cost of the work will be added to the connection fee</i> 	Calculation*			
Contract handling fee <i>Added to each connection contract</i>	60.00	euros per contract	72.00	euros per contract

Connection to the power network for medium voltage

Service	Price not including VAT		Price including VAT	
Connection for medium voltage <ul style="list-style-type: none"> <i>Elektrilevi project management fee at a rate of 3.35% of the total cost of the work will be added to the connection fee</i> 	Calculation*			
Contract handling fee <i>Added to each connection contract</i>	60.00	euros per contract	72.00	euros per contract

*Calculation: calculated from the actual costs. Includes the cost of equipment, materials and building work.

Elektrilevi price list

Valid from 14.07.2022

Connection to the network for an electricity producer

Service	Price not including VAT	Price including VAT
Connection to the power network for a producer of up to 15 kW if the connection point is less than 400 m from a low-voltage substation <ul style="list-style-type: none"> Calculated from the actual costs (calculation) but not less than the ampere price based fee 	Calculation*	Calculation* but not less than the ampere price fee for connection to the power network for low voltage
Connection to the power network for a producer of up to 15 kW if the connection point is more than 400 m from a low-voltage substation <ul style="list-style-type: none"> Elektrilevi project management fee at a rate of 3.35% of the total cost of the work will be added to the connection fee 	Calculation*	
Connection for a producer of 16–200 kW for low voltage <ul style="list-style-type: none"> Elektrilevi project management fee at a rate of 3.35% of the total cost of the work will be added to the connection fee 	Calculation*	
Connection for a producer of over 200 kW for low voltage <ul style="list-style-type: none"> Elektrilevi project management fee at a rate of 3.35% of the total cost of the work will be added to the connection fee 	Calculation*	
Connection to the power network for an electricity producer for medium voltage <ul style="list-style-type: none"> Elektrilevi project management fee at a rate of 3.35% of the total cost of the work will be added to the connection fee 	Calculation*	
Contract handling fee <i>Added to each connection contract</i>	60.00	euros per contract
		72.00 euros per contract

*Calculation: calculated from the actual costs. Includes the cost of equipment, materials and building work.

Connection to the power network in special cases

Service	Price not including VAT	Price including VAT
Creation of an additional independent network connection in a low-voltage network	Calculation*	
Connection to the power network for low voltage if the connection point is less than 400 m from a low-voltage substation but there is a significant obstacle to the connection (e.g. sea, lake, marsh, protected zone, utility works, navigable river, etc.)	Calculation*	
Joining a three-way cooperation agreement	3.35% of the total cost of work	
Contract handling fee <i>Added to each connection contract</i>	60.00	

*Calculation: calculated from the actual costs. Includes the cost of equipment, materials and building work.

Elektrilevi price list

Valid from 14.07.2022

Signing a network contract

Service	Price not including VAT		Price including VAT	
Signing a network contract	Free of charge			
Changing the network service price package if the last change was less than 365 days ago	3.25	euros per contract	3.90	euros per contract

Main fuse services

Service	Price not including VAT		Price including VAT	
Increase in the nominal current of the main fuse or purchase of additional amps if the connection point is less than 400 m from a low-voltage substation	165.00	euros per amp	198.00	euros per amp
Increase in the nominal current of the main fuse or purchase of additional amps if the connection point is more than 400 m from a low-voltage substation	Calculation*			
Replacement of a main fuse of up to 63 A <i>No contract handling fee is charged</i>	43.00	euros per project	51.60	euros per project
Replacement of a main fuse of over 63 A	Calculation*			
Reduction of the amperage of a main fuse of up to 63 <i>No contract handling fee is charged</i>	Free on charge			
Reduction of the amperage of a main fuse of over 63 A <i>No contract handling fee is charged</i>	Free on charge			
Division of the nominal current in a main fuse	Calculation*			
Restoration of the amperage of a main fuse of up to 63 A** <i>No contract handling fee is charged</i>	43.00	euros per project	51.76	euros per project
Restoration of the amperage of a main fuse of over 63 A	Calculation*			
Contract handling fee <i>Added to each connection contract</i>	60.00	euros per contract	72.00	euros per contract

*Calculation: calculated from the actual costs. Includes the cost of equipment, materials and building work.

**The main fuse amperage can be restored within three years of lowering and there is a fee for the service. The cost of restoring the main fuse amperage depends on how many customers have connected to the same network after the reduction of the amperage. If the network does not require strengthening (few new connections have been made), the amperage can be restored at 42.67 euros per project (the price of changing the main fuse). If the network requires strengthening, the customer has to pay a calculated price for the restoration of the amperage also for a fuse of up to 63 A.

Valid from 14.07.2022

Metering services

Service	Price not including VAT		Price including VAT	
Replacement or installation of an electricity meter (metering system)	51.00	euros per meter	61.20	euros per meter
Unscheduled metering system inspection <i>-A meter replacement fee of 61.20 euros is added to the price if meter is ok</i>	60.00	euros per meter	72.00	euros per meter
Replacement of a electricity meter (metering system) by Elektrilevi OÜ after the completion of verification of the meter	Free of charge			

Changing the power system

Service	Price not including VAT		Price including VAT	
Change from a single-phase connection to a three-phase connection	Calculation*			
Connection of a place of consumption of 3 x 220 V (Tallinn old voltage system) to a 3 x 220/400 V power system <i>No contract handling fee is charged</i>	Free of charge			
Contract handling fee <i>Added to each connection contract</i>	60.00	euros per contract	72.00	euros per contract

*Calculation: calculated from the actual costs. Includes the cost of equipment, materials and building work.

Sealing*

Service	Price not including VAT		Price including VAT	
Sealing of an electrical installation at the customer's request**	30.00	euros per project	36.00	euros per project
Sealing of an electrical installation and removal of an earlier seal at the customer's request	31.00	euros per project	37.20	euros per project
Sealing in bulk for electrical installations (starting from the second seal in a building) at the customer's request	4.00	euros per seal	4.80	euros per seal

*If it turns out at the place of consumption that the customer has not done the necessary work, a call-out fee of 30.00 euros will be added.

**The price also applies if some connection points are not sealed during sealing in bulk.

Elektrilevi price list

Connection switching services

Service	Price not including VAT		Price including VAT	
Disconnection of the power at the metering point of a place of consumption	40.00	euros per project	48.00	euros per project
Connection of the power at the metering point of a place of consumption (re-connection)	40.00	euros per project	48.00	euros per project
Disconnection of the power at the metering point of a place of consumption <ul style="list-style-type: none"> For a remotely read meter up to 63 A If the main fuse is switched off, a call-out fee of 30.00 will apply 	6.50	euros per project	7.80	euros per project
Connection of the power at the metering point of a place of consumption <ul style="list-style-type: none"> For a remotely read meter up to 63 A If the main fuse is switched off, a call-out fee of 30.00 euros will apply 	6.50	euros per project	7.80	euros per project
Disconnection of a place of consumption (a customer's electrical installation) from the network	75.00	euros per project	90.00	euros per project
Reconnection of a place of consumption (a customer's electrical installation) to the network	75.00	euros per project	90.00	euros per project
Deactivation of a power line	55.00	euros per project	66.00	euros per project
Activation (re-connection) of a power line	55.00	euros per project	66.00	euros per project

External electrical network renovation

Service	Price not including VAT		Price including VAT	
Relocation of an electrical network	Calculation*			
Relocation of a junction box	Calculation*			
Relocation of a connection point	Calculation*			
Combining multiple metering points into one in the low voltage switchgear at a substation	Calculation*			
Combining multiple metering points into one beyond the connection point	Calculation*			
Contract handling fee <i>Added to each connection contract</i>	60.00	euros per contract	72.00	euros per contract

*Calculation: calculated from the actual costs. Includes the cost of equipment, materials and building work.

Elektrilevi price list

Valid from 14.07.2022

Connection reactivation

Service	Price not including VAT		Price including VAT	
Connection reactivation	Calculation*			
Contract handling fee <i>Added to each connection contract</i>	60.00	euros per contract	72.00	euros per contract

*Calculation: calculated from the actual costs. Includes the cost of equipment, materials and building work.

If the connection point is less than 400 m from a low-voltage substation, the reactivation fee will not exceed a connection fee calculated from the ampere price

Technical inspection documents

Service	Price not including VAT		Price including VAT	
Issuing technical inspection documents: - designs for structures and communications - construction of temporary network connections - detailed plans	34.89	euros per job	41.87	euros per job

Joint access to electricity network

Service	Price not including VAT		Price including VAT	
Fee for concluding a contract for the use of physical infrastructure, small project	102.14	euros per project	122.57	euros per project
Fee for concluding a contract for the use of physical infrastructure, big project	232.61	euros per project	279.13	euros per project
Transport and transmission of fault notification fee	47.07	euros per project	56.48	euros per project

Elektrilevi price list

Coordination

Service	Price not including VAT		Price including VAT	
Consultations for designs of buildings and communications	17.45	euros per project	20.94	euros per project
Coordination of designs for buildings and communications: medium design	34.89	euros per project	41.87	euros per project
Coordination of designs for buildings and communications: large-scale design	69.78	euros per project	83.74	euros per project
Coordination of designs for buildings and communications: large-scale design (large-scale infrastructure design)	194.81	euros per project	233.78	euros per project
Coordination of designs for buildings and communications: small design (within the limits of one property)	17.45	euros per project	20.94	euros per project

Activities in a protected zone and coordination

Service	Price not including VAT		Price including VAT	
Pinpointing the location of a power cable	70,00	euros per project	84,00	euros per project
Coordinating activities in the network or a substation in a protected zone	18,00	euros per project	21,60	euros per project

Consumption statements for apartment buildings

Service	Price not including VAT		Price including VAT	
Electricity consumption statements for apartment buildings with up to 20 place of consumption	10.23	euros per stmt	12.28	euros per stmt
Electricity consumption statements for apartment buildings with 21 to 60 place of consumption	13.42	euros per stmt	16.10	euros per stmt
Electricity consumption statements for apartment buildings with more than 60 place of consumption	15.98	euros per stmt	19.18	euros per stmt

Elektrilevi price list

Valid from 14.07.2022

Release of data

Name	Price without VAT		Price with VAT	
Release of electricity consumption data <ul style="list-style-type: none"> Data on electricity consumption and network contracts can only be requested by the owner of the contract or a person authorised by them. In the case of extensive requests, the fee will be multiplied. 	18.00	euros/pc	21.60	euros/pc
Release of network location data	15.00	euros/pc	18.00	euros/pc
Release of network location data, large object <ul style="list-style-type: none"> Areas more than three hectares or work lasting more than two hours. 	60.00	euros/pc	72.00	euros/pc

Call-outs and repair team call-outs, including electrical work

Name	Price without VAT		Price with VAT	
Call-out fee	25.00	euros/pc	30.00	euros/pc
Repair team call-out	24.92	euros/pc	29.90	euros/pc
Services provided by the repair team on site: <ul style="list-style-type: none"> Breakdown repairs in the customer's electrical system* Each additional 30 minutes 	52.00	euros/pc	62.40	euros/pc
	29.17	€/30 min	35.00	€/30 min

The call-out fee must be paid if it is discovered on site that the preparations for which the customer is responsible have not been performed or if the metering system is functioning properly.

For example:

- you have ordered the sealing service but not performed the necessary preparations, so that sealing is not possible
- you have disconnected your place of consumption from the main fuse and not the switch on the meter, regardless of the reminders
- you have notified us of a breakdown of the meter or programmable clock, but it is evident on site that the metering system is functioning properly. Electricians cannot be called out as a separate service

The fee for the repair team call-out must be paid if the team arrives and finds the breakdown to be in the customer's electrical installation inside their apartment or house (internal electrical system).

If it turns out after the team's arrival that the breakdown is in the customer's electrical system, it is possible to order its repair. We repair the breakdown in the customer's electrical system. The price includes up to 30 minutes of work.

The following will be added to the price of repair:

- additional material used to repair the breakdown (terminals, additional cables, etc.)
- the repair team call-out fee (29.90 euros with VAT)
